

Typical Applications for Trial Formulations

Formulation	Application Areas	Description of Formulated Products
451	Vibration Damping	45 Shore A durometer for hydrocarbon fuel and fluid resistant vibration isolator and shock mounts.
651	General Purpose	65 Shore A durometer easy processing, high elongation with lower heat resistance.
701	O-Rings	70 Shore A Durometer for aerospace O-rings and seals, with excellent resistance to mineral oil based and synthetic lubricant hydraulic fluids.
702	Seals and Hoses	70 Shore A Durometer low compression set material for seals an hoses in aircraft fuel and lubricating oil systems.
751D	O-Rings and Seals	75 Shore A Durometer for aerospace O-rings and seals. High tear strength with excellent resistance to mineral oil based and synthetic hydraulic fluids.
752	Vibration Damping and Diaphragms	75 Shore A Durometer for aircraft engine vibration isolators, shock mounts and diaphragms for fuel contact.
801	Vibration Damping	80 Shore A Durometer for hydrocarbon fuel and fluid resistant aircraft engine vibration isolators and shock mounts.
